

SUMMARY

Full-stack developer with hands-on experience building scalable web applications, AI-assisted systems, and real-time platforms using the MERN stack. Experienced in backend architecture, LLM-integrated workflows, and modern web technologies. Passionate about solving practical problems through intelligent software systems, system optimization, and efficient application design.

WORK EXPERIENCE

Full Stack Developer Intern Apr 2025 – Oct 2025
Creative Upaay

- Designed and implemented scalable multi-tenant architecture with secure tenant-aware APIs and strict data isolation
- Built modular backend systems using controller-service-repository architecture to improve maintainability and development efficiency
- Developed AI-assisted workflow and content generation systems using LLM APIs, asynchronous pipelines, caching, and prompt orchestration
- Implemented real-time communication features using WebSockets and event-driven architecture for live application updates
- Designed role-based access control (RBAC) and secure authentication mechanisms for multi-user systems

PROJECTS

Aahar AI | React.js, TypeScript, Node.js, MongoDB, Gemini API | [GitHub](#) | [Live](#)

- Built an AI-powered nutrition and fitness platform with personalized meal planning, calorie tracking, and workout monitoring
- Integrated Gemini API for food analysis using image recognition and natural language meal logging
- Developed scalable mobile-first architecture using React, Express.js, MongoDB, Redux Toolkit, JWT authentication, and PWA support

Career Community Connector | MERN | [GitHub](#) | [Live](#)

- Built a platform to connect professionals within the same domain for networking and collaboration
- Implemented authentication, user profiles, and community interaction features
- Designed REST APIs and optimized backend queries.

HeadlineHarbor | React.js, News API, Bootstrap | [GitHub](#) | [Live](#)

- Developed a news aggregation platform delivering real-time global news
- Integrated third-party APIs and implemented dynamic UI rendering

ACHIEVEMENTS

- Qualified GATE 2026 (Data Science & Artificial Intelligence) with AIR 1718

SKILLS

Languages	C++, JavaScript
Frontend	React.js, Redux, HTML, CSS, Bootstrap, Material UI
Backend	Node.js, Express.js
Database	MongoDB, Mongoose, Redis
Technologies	MERN Stack, REST APIs, WebSockets (Socket.io), RBAC, Real-time Systems
Core Concepts	Data Structures & Algorithms, OOPs, DBMS, Operating Systems, System Design Basics
Tools	Git, GitHub, Postman, VS Code, Linux, Linux Customization
AI & APIs	Gemini API, OpenAI API, Prompt Engineering, REST APIs

EDUCATION

B.Tech – Artificial Intelligence & Data Science Nov 2022 – July 2026
College of Technology and Engineering, Udaipur

- OGPA: 7.56
